

We are here to help end packaged water

**THIS IS
HOW YOU
CAN HELP.**

How to ban packaged water for good.

Phase out single- use packaged water

Commit to phasing out the production and distribution / sales of single-use packaged water by 2025.

Advocate for policy change

Use influence and resources to advocate for government policies and legislation that support sustainability and the reduction of packaged water.

How to create awareness. Encourage change.

Collaborate for impact

Collaborate with other companies, NGOs, industry associations, and government bodies to develop industry-wide EPR programs that standardise responsibility practices.

Consumer education

Educate consumers on the environmental impact of single-use packaged water, promote reusable alternatives and the drinking of tap water.

How to improve access to free tap water.

Make refilling easy and convenient

Improve access to tap water by installing water taps and offering reusable cups/bottles by 2025. Free tap water in hospitality immediately.

We are on a mission to end packaged water by getting people to drink tap water.

We must act now.

We can help deliver tangible results on water policy and water security.
